News From the Editor:

Just a short newsletter this month as we are caught up on our minutes until the end of the month.

It is fast approaching my favorite time of year, foaling season! Send those foal announcements for publishing in the newsletter and on the website. So far this year the Bradsher household has not had any foals, but we were blessed with twin Nigerian Dwarf kids on January 2, a buck and a doe.

There are lots of new names on the roster and our Facebook page now has over 100 fans! Be sure to utilize it to get time sensitive announcements out to the fans of the page. It is also a great spot to share your horse related photos.

As always, any corrections or updates for the newsletter can be sent to Michelle Bradsher at michelle@bluetreefarm.com

Murphy's Horse Laws

- There is no such thing as a sterile barn cat.
- No one ever notices how you ride until you fall off.
- The least useful horse in your barn will eat the most, require shoes every four weeks, and need the vet at least once a month
- A horse's misbehavior will be in direct proportion to the number of people who are watching.
- Your favorite tack always gets chewed on, and your new blanket gets torn.
- Tack you hate will never wear out, and blankets you hate cannot be destroyed.
- Horses you hate cannot be sold and will outlive you.
- Clipper blades will become dull when your horse is half clipped.
- If you approach within 50 feet of your barn in clean clothes, you will get dirty.
- The number of horses you own will increase to the number of stalls in your barn.
- Your barn will fall down without baling twine.
- Hoof picks always run away from home.
- If you fall off, you will land on the site of your most recent injury.
- If you are winning, then quit, because there is only one way to go. Down!
